Summary

I am an aspiring software developer, who is deeply interested in software and how it work under the hood.
My interests include web, mobile development, systems design, artificial intelligence as well as operating systems and compilers.

Education

Nanyang Polytechnic <i>Diploma in Information Technology</i>	<i>Singapore</i> Apr 2023 – Apr 2026
Holy Innocents' High School <i>in GCE 'O' Levels</i>	<i>Singapore</i> Jan 2018 – Dec 2022

Skills

Languages: Python, Go, Rust, Kotlin, C, C#, JavaScript, TypeScript, Node, React
Machine Learning: PyTorch, TensorFlow, LangChain, HuggingFace, ONNX
Infrastructure: Docker, Docker Compose, MySQL, MS SQL, SQLite, Redis, KeyDB
Others: Git, Bash, PowerShell, HTML, CSS, SASS, Tailwind, Bootstrap

Experience

EUC Systems Intern <i>Fujitsu</i>	<i>Singapore</i> Mar 2025 – May 2025
- Assisted end users with <i>troubleshooting software issues</i>, wrote Python scripts to automate email notifications. - Imaging, setting up and wiping data for 80+ Windows 11 laptops. Tagged and accounted for over 120+ assets.	

Relevant Coursework

Automo SARIMA time-series dashboard with Docker Compose in <i>decoupled services architecture</i> .	<i>Nanyang Polytechnic</i> Jan 2026 – Feb 2026
- KeyDB for in-memory caching, Goatcounter for <i>observability</i> and Gemini generated Executive Summary.	
NYP-FYP CNC Chatbot	<i>Nanyang Polytechnic</i> June 2025 – Aug 2025
- Reduced startup time from 30 seconds to under 10 seconds. - Added quality of life features such as search, rate limits, audio preprocessing, containerisation with Docker.	

Projects

yams Media Screensaver Terminal User Interface (TUI) written with C and ncurses.	<i>Apr 2026 – Present</i>
- Event-driven architecture via D-Bus/MPRIS with parallel FFmpeg workers and a 200ms debounce for flicker-free UI transitions. - Engineered a resilient asset pipeline with localized image caching and exponential backoff retry logic for robust remote metadata handling. - Statically-linked ~1.5 MB binary featuring a zero-leak memory profile (Valgrind-verified) and negligible idle CPU overhead (<2%).	
pdf-fmt Lightweight, self-contained utility that extracts images, structured Markdown tables and text from PDF documents.	<i>Oct 2025 – Present</i>
- Comprehensive configuration suite with regex exclusions, output formatting and image deduplication.	
flexcyon Obsidian.md theme with terminal inspired aesthetics, over 3000 downloads and 300+ customisation options .	<i>Sept 2024 – Present</i>
- Use of SCSS for <i>codebase modularity</i>, with SemVer and linting. Documentation in both <i>English and Chinese</i>.	

Co-curriculars

NDP 2024 Motivators Participated in Singapore's National Day Parade.	<i>May 2024 – Aug 2024</i>
Hwa Chong Mindsports Championships Participated in the international chess competition representing my Polytechnic.	<i>Apr 2024</i>
Project Mid-Autumn Festival Involved as Student Organiser , planning logistics and activities during the event at the elderly home.	<i>July 2023 – Sept 2023</i>

HIHS Chinese Weiqi Club Involved as Executive Committee Member, with roles in Publicity, Mentorship and organising the inaugural Weiqi Immersion Fortnight.	<i>Feb 2021 – Feb 2022</i>
--	----------------------------

Awards and Honors

MOE Edusave Award for Achievement, Good Leadership and Service (EAGLES) Ministry of Education (MOE)	<i>2021</i>
---	-------------

Certifications

Certificate of Participation for Beyond Borders with DDAS Hong Kong Edition Digital Defence Alliance Singapore (DDAS)	<i>2025</i>
Google Data Analytics Coursera	<i>2025</i>
Google IT Automation with Python Coursera	<i>2024</i>
